

UNIT TEST RAJENDRA VIDYALAYA

4 Pages

II-VIII

Name : Shivam Kumar Subject : Chemistry
Standard : 8'A Date : 02/05/26 Roll No. : 46

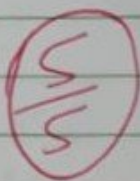

Q1)

Ans a) Protons ✓

Ans b) Atomic number ✓

Ans c) Neutrons ✓

Ans d) Not Nucleus ✓

Ans e) anion ✓

$\frac{16\frac{1}{2}}{20}$
Lm
2/6/2026

Q2)

Ans → Two main features of Rutherford's atomic model are:-

- Most of rays passed straight through the foil without any deflection.
- A few of them bounced bounced back.

Q3)

Ans → Atomic number = 4

Mass number = Number of protons + Number of neutrons
= 4 + 5

= 9

$\frac{16\frac{1}{2}}{20}$
Lm
2/6/2026

The atom is Beryllium and the symbol is ${}^9_4\text{Be}$.

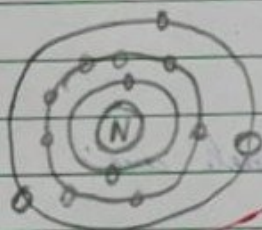

Q4)

Ans → The number of ^{mass} protons and the number of neutrons are same but the ~~atomic~~ number is different is known as isotopes.
The three isotopes of hydrogen are H_1 , H_2 , H_3

Q5)

Ans → ${}^{27}_{13}\text{Al}$

Atomic diagram

Mass number = 27

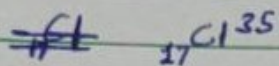

Atomic number = 13

Number of protons =

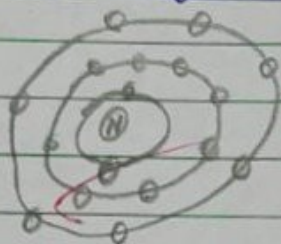

Number of neutrons = $A - Z = \text{Mass number} - \text{Atomic number}$
 $= 27 - 13$
 $= 14$

Number of protons = 13

Electronic configuration of Aluminium is $= 2, 8, 3$

Atomic diagram

Mass number = 35

Atomic number = 17

Number of neutrons = $A - Z$ = Mass number - Atomic number
 $= 35 - 17$
 $= 18$

Number of protons = 17

Electronic configuration of chlorine is = 2, 8, 7
